

GRAVELY

1500 WATT GENERATOR

PROTECTION FOR YOUR HOME AND FAMILY FROM POWER FAILURE!

Now you can be safe from the inconvenience and danger of power failure. Interruptions of power can lose a freezer-full of food, can put your family at the mercy of freezing weather if your heating system is electrically controlled. Without light, without power for well-pumps or other important appliances, existence can be pretty miserable. It can be dangerous as well, unless you have a stand-by source of power.

Gravely offers you a 1500 Watt Generator that attaches to your Gravely Tractor. With it you can keep that heating system going, your appliances operating, protect your home and your family.

The Generator attaches to the front of the Gravely Tractor

with only four bolts. When power fails, simply attach to your Gravely, plug in to the receptacle, and power once more flows through your home.

The generator is also a portable source of power for electrical hedge-clippers, drills, portable saws. You take power to the job, quickly, easily!

The price is less than your loss if your power goes off and you lose one ordinary freezer of food! And what price can you put on the safety and comfort of your family!

Be prepared to produce your own emergency power with a Gravely Generator attachment!

SPECIFICATIONS

Continuous duty, 1500 Watt, 115 Volt. Two wire, single-phase, 60 cycle (Alternate Current) Generator RPM: at 3600 RPM, carries intermittent rating of 1800 voltamperes, providing a 20% overload safety factor.

Starts: one-quarter Horsepower Split Phase Motor, or one-half horsepower capacitor type motor, or three-quarter Horsepower repulsion-induction motor, if no other load is on the line.

Voltmeter and two-plug heavy duty receptacle included. Pulleys guarded.

NOTE: Gravely Power Take-Off and Governor are required. A Double-throw switch is also a necessity... full instructions are packed with the generator.

GRAVELY GENERATOR—

Portable Electric Power

NOW, with the 6.6 HP Gravelly Tractor and its Generator Attachment, you drive your own electrical power right to the job--Wherever it may be!

The use of your electrical tools is no longer limited to the length of your extension cord...no longer are you forced to use hand tools because the job is too far away from your nearest receptacle.

Home Owners

Home owners transport electric power for your hedge-clippers, electric pruner, chain saws. Just plug your tool into the Generator's receptacle and you're ready to go to work--with power supplied by your Gravelly Tractor.

Industrial Users

Industrial people use the Gravelly Generator for drills, grass trimmers and other electrical equipment. When you carry Gravelly power to the job, you do it faster, easier and more efficiently.
