

# GRAVELY — PLANTER DRILL

## PORTABLE, SELF-PROPELLED PLANTER DRILL FOR LANDSCAPING AT THE HOME, NURSERY WORK

The Gravelly Tractor and its Planter Drill travels easily in a pick-up truck—with the plantings! On the spot hole digging speeds up landscaping jobs, saves time and work.

At the nursery, accurate checking, straighter rows . . . plus speed! Actually, the Gravelly with one man will dig more holes, more accurately, than two men and big tractor equipment!

The Gravelly is the only logical tool for replacement plantings . . . the Gravelly gets between the rows, gives you power planting in places the big equipment can't go!

Designed for nurserymen by a nurseryman—practical, time and money saving!
